For any further clarifications please contact Nodal Officer - Principal, Project Livelihood College society, KORBA district during official working hours only.

Background:

Project Livelihood College society, KORBA district intends to establish a incubator for promotion of livelihood activities in Agriculture and Allied Sectors with market linkage at Project Livelihood College society, KORBA district to help the local farmers, tribal and aspiring entrepreneurs to gain necessary knowledge and markets in the Agriculture and allied sectors. This incubator should give a complete understanding and knowledge in the subject domains and translate to the local farmers. The incubator should be in a knowledgable position to help beneficiaries towards engagement in the developmental schemes from the Government.

Objective:

Korba District is one of the fastest growing districts in the state of Chhattisgarh due to its abundant natural resources, industry potential, forest resources and rail, road connectivity. It is important to translate benefits of the rapid growth to the district population as majority of the district population are dependent on agriculture and allied sectors for their daily needs. However due to lack of education and adaptability to modern practices and market linkages the farmers of the district are not able to become profitable. Number of people who are falling under this category are increasing day by day. Unless and until profitability to farmers is not increased future employability of the people becomes a biggest challenge and sustainability of the district population is at stake.

Innovative approaches and new models need to be adapted to further strengthen the farming community and increase the reach. Through this incubator our objective is to bring together the best practices in the sectors namely Horticulture, Animal husbandry, Fisheries, Agriculture and any other livelihood promotion activity covering the local production practices under one roof. In this effort our aim is to bring together the best practices, technology adaptation, marketing to build success stories so that the change can be inspired masses and then handhold through our existing district mechanism for the overall development.

The incubator should feature services that can help the beneficiaries implement/adapt developmental opportunities in the district as well as witness the development happening across the state.

The training content in the incubator will be sourced from the qualified individuals/leaders/entrepreneurs across the Agriculture and Allied sectors.

Overall the incubator is a one stop solution for technology, skilling, knowledge gaining, opportunity understanding, exposure towards Government efforts and marketing.

Period of Work: Maximum 3 years from the date of awarding of work order.

Scope of work - Annexure - (A)

Sector	Scope of work
Horticulture	<ul style="list-style-type: none">• Technology for cultivation of Horticulture crops• Value addition to farmers• Market linkage
Agriculture	<ul style="list-style-type: none">• Organic certification• Market linkage
